Experience

Software Engineer - Niroga AI Inc. *2025 Aug - Current (Concurrent)*

REST APIs | Kotlin | Fast API | Swift | ReactNative | React JS | Next JS | Postgresql | SQLite | AWS | Linode | Docker|

- Spearheaded under **Dr. Yasantha Rajakarunanayake** the end-to-end architecture of a production-grade **FastAPI REST API backend**, engineering a **high-performance API layer with latency management, async processing, and thread-safe concurrency**, reducing average API response time by **40%** across **web** and **mobile clients**.
- Solely owned and administered the complete **CI/CD pipeline** across **AWS EC2** and **Linode (production + staging)** with **Docker** and **Git automation**, handling all server security operations including malware detection, anomaly monitoring, and infrastructure hardening end-to-end.
- **Architected a multi-LLM gateway integrating Gemini and OpenAI APIs with MCP** (Model Context Protocol) to expose backend services as AI-accessible tools, enabling AI-powered consultation features with centralized **LLM traffic governance**, directly aligned with modern agentic API ecosystems.
- Developed and maintained **Kotlin (Android) and Swift (iOS)** mobile applications with an **offline-first sync architecture using SQLite, PowerSync, and Supabase**, ensuring seamless data consistency across zero-connectivity environments.

Software Engineer - BlueLotus360 (PVT) Ltd *2025 Aug - Current (Concurrent)*

ASP.NET Core| BlazorHybrid | syncfusion | SQL | SSMSE | AzureDevOps | PushNotificationHUB | FCM | APNS | UX

- Engineered a **Ticketing Management System** for an **ERP solution** on **ASP.NET Core** with **Azure Notification Hub**, designing **sync and async APIs with latency management, bottleneck handling, and thread-safe concurrency**, backed by a persistent **FCM** and **APNS** notification queue with automatic retry on failure under high-concurrency loads.
- Architected a complete **Azure DevOps CI/CD pipeline** across **4 deployment tracks** for **iOS** and **Android**, **resolving a critical bundle ID conflict** causing application swapping between two co-existing versions, enabling independent parallel builds for both legacy and active codebases.
- Drove the full migration of the legacy **Blazor Hybrid ERP mobile application** to the latest framework, establishing clean codebase separation between **BL10 and BL11** across both platforms.

Associate Software Engineer - Altrium *2025 May - 2025 Aug*

Spring Boot | React JS | Fast API | Spring AI | MongoDB | Rabbitmq | AWS | Jenkins | Docker | Gradle |

- Co-ordinated to the lifecycle of **PlanYear**, a SaaS platform used in **Silicon Valley**. Enabled secure data exchange for **50,000+** users across brokers, carriers, and buyers with multi-level access.
- Integrated Spring AI with email generation for insurance proposal exports, automating **100+** daily communications, saving **5 hours weekly**, and accelerating delivery by **25%**.
- Revamped project workflows for SaaS platform, addressing critical support bugs that caused inconsistency, which led to a **10% reduction** in production incidents related to data inconsistency.

Software Engineer Intern - Vetstoria *2023 - 2024*

Spring Boot| MySQL | API Testing | React.js | Vue.js | Docker | MVC |

- Enhanced the Reporting API with Spring Boot, increasing session data coverage by **12% for 200 clinics and delivering 20%** deeper insights for business decisions.
- Played a key role in Autonoe, a middleware solution orchestrating message queues across **4 SaaS** products, relied on by **40% of clinics** for seamless integration between PIMS and Applications.
- Developed features and documentation in an internal Frontend component framework, ensuring design consistency and guiding **4 internal teams across products**.

Skills

Languages
- C#
- Python
- Java
- Kotlin
- Swift

Back End
- ASP.NET Core
- Spring Boot
- Fast API
- Flask
- NodeJS

Front End
- ReactNative
- React.js
- Next.js
- Angular.js
- Tailwind

Database
- SQL
- Postgresql
- MongoDB
- Firebase
- Redis

Cloud
- AWS
- Azure
- Linode
- Docker
- Kubernetes

AI
- Langchain
- Langraph
- MCP
- RAG
- VectorDB

Achievements

IEEE Quantum Communications, Networking & Computing Conference — Japan *2026*

- Selected among global PhD researchers to present quantum research at IEEE ICQCNC, Japan as a bachelor's undergraduate on the first research attempt.

Best Final Year Project In Computer Science *2025*

- Received the best research project award for QuanNetDetect, a comprehensive study on detecting malicious TLS encrypted traffic using quantum deep learning.

Disrupt Asia 2026 & National AI Expo — Selected Final Participant *2025*

- Selected for Disrupt Asia 2026 and Sri Lanka's first-ever AI Expo, presenting to the President, Prime Minister and Minister of Digital Economy.

Best Undergraduate Research Project - University of Moratuwa (ADScAI) *2025*

- The ADScAI conference held by the University of Moratuwa awarded the best undergraduate research to QuanNetDetect, a quantum framework for enhanced encrypted security.

Education

University of Westminster - Westminster, United Kingdom
BSc (Hons) Computer Science *2021 - 2025*

- Graduated with First class. - **Avg (78.14%)**
- **Best Final Year Computer Science Project of the Year - Presented by University of Westminster.**

Informatics Institute of Technology affiliated with University of Westminster
Foundation in Higher Education *2020 - 2021*

- Distinction Pass
- Average - 80%
